BA PROGRAMME WITH HONOURS IN ECONOMICS
(CBCS)
COURSE OUTCOME

COURSE CODE	COURSE TITLE	COURSE OUTCOME
ECNHC101	Introductory Microeconomics	This course is designed to expose the students to the basic principles of microeconomic theory.
ECNHC102	Mathematical Methods for Economics–I	The objective of this sequence is to transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomic theory, macroeconomic theory, statistics and econometrics set out in this syllabus.
ECNHC201	Introductory Macroeconomics	This course aims to introduce the students to the basic concepts of Macroeconomics. This course discusses the preliminary concepts associated with the determination and measurement of aggregate Macroeconomic variables like savings, investment, GDP, money, inflation and the balance of payments.
ECNHC202	Mathematical Methods for Economics - II	The objective of this sequence is to transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomic theory, macroeconomic theory, statistics and Econometrics set out in this Syllabus.
ECNHC301	Essentials of Microeconomics	The course is designed to provide a sound training in microeconomic theory to formally analyze the behaviour of individual agents. This course looks at the behaviour of the consumer and the producer and also covers the behaviour of a competitive firm.
ECNHC302	Essentials of Macroeconomics	This course introduces the students to formal modeling of a macro-economy in terms of analytical tools. It discusses various alternative theories of output and employment determination in a closed economy in the short run as well as medium run, and the role of policy in this context. It also introduces the students to various theoretical issues related to an open economy.
ECNHC303	Statistical Methods for Economics	This is a course on statistical methods for economics. It begins with some basic concepts and terminology that are fundamental to statistical analysis and inference. It then develops the notion of probability, followed by probability distributions of discrete and continuous random variables and of joint distributions. This is followed by a discussion on sampling techniques used to collect survey data.
ECNHC401	Advanced Microeconomics	This course is a sequel to Essentials of Microeconomics. The emphasis will be on giving conceptual clarity to the student

		coupled with the use of mathematical tools and reasoning. It covers general equilibrium and welfare, imperfect markets and topics under information economics
ECNHC402	Advanced Macroeconomics	This course is a sequel to Essentials of Macroeconomics. In this course, the students are introduced to the long run dynamic issues like growth and technical progress. It also provides the micro-foundations to the various aggregative concepts used in the previous course.
ECNHC403	Introductory Econometrics	This course provides a comprehensive introduction to basic econometric concepts and techniques. It covers statistical concepts of hypothesis testing, estimation and diagnostic checking of simple and multiple regression models. The course also covers the consequences of and tests for misspecification of regression models.
ECNHC501	Indian Economy- I	Using appropriate analytical frameworks, this course reviews major trends in economic indicators in India in the post-Independence period, with particular emphasis on paradigm shifts and turning points.
ECNHC502	Development Economics - I	This is the first part of a two-part course on economic development. The course begins with a discussion of alternative conceptions of development and their justification. It then proceeds to aggregate models of growth and cross-national comparisons of the growth experience that can help evaluate these models.
ECNHC601	Indian Economy- II	This course examines sector-specific policies and their impact in shaping trends in key economic indicators in India. Emphasis needs to be given in capturing the emerging issues.
ECNHC602	Development Economics-II	This is the second module of the economic development sequence. It begins with basic demographic concepts and their evolution during the process of development. The structure of markets and contracts is linked to the particular problems of enforcement experienced in poor countries. The governance of communities and organizations is studied and this is then linked to questions of sustainable growth. The course ends with reflections on the role of globalization and increased international dependence on the process of development.
ECNHDSE505	Money and Financial Markets	This course exposes students to the theory and functioning of the monetary and financial sectors of the economy. It highlights the organization, structure and role of financial markets and institutions. It also discusses interest rates, monetary management and instruments of monetary control. Financial and banking sector reforms and monetary policy with special reference to India are also covered.
ECNHDSE506	Public Economics	The paper deals with the nature of government intervention and its implications for allocation, distribution and stabilization.
ECNHDSE602	Environmental	This course aims to focus on economic causes of

	Economics	environmental problems; in particular, how economic principles are applied to environmental questions and their management through various economic institutions, economic incentives and other instruments and policies. It also aims to address Economic implications of environmental policy as well as valuation of environmental quality, quantification of environmental damages, tools for evaluation of environmental projects such as cost-benefit analysis and environmental impact assessments.
ECNHSE605	History of Economic Thought	The objective of this course is to acquaint the learners with the historical developments in the economic thoughts propounded by different schools.
